

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Field	Details
Date	28 September 2026
Team ID	SWTID-2026-4815
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	UI Policy Configuration (High Impact Control)	Create UI Policy on Incident table / Condition: Impact = 1-High / Active = true / Reverse if false = true
FR-2	UI Policy Actions	Assignment group Mandatory and Urgency Read-only when Impact = High (Visible left unchanged)
FR-3	Client Script - onChange (Auto set urgency for high impact)	Auto-set Urgency to High when Impact field changes to High
FR-4	Client Script - onSubmit (Prevent save if Assigned To missing)	Block save and show error if Assigned To is empty when Impact = High
FR-5	Client Script - onCellEdit (Prevent state change via list edit)	Block any direct State field edit from the Incident list view

Non-functional Requirements:

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Error messages (e.g., Assigned To missing) and alerts (State list edit block) must be clear and actionable
NFR-2	Security	Only users with ITIL/incident_manager role can modify the UI Policy and Client Script configuration
NFR-3	Reliability	Validation must trigger consistently: Urgency read-only + auto-set on Impact change, Assigned To check on submit, State block on list edit
NFR-4	Performance	Client Scripts must execute in real-time (<1 sec) without noticeable form lag
NFR-5	Availability	Configuration must work across all sessions/users without requiring cache refresh
NFR-6	Scalability	Same UI Policy + Client Script pattern can extend to other impact levels or tables
