

Project Design Phase-II

Data Flow Diagram & User Stories

Field	Details
Date	28 September 2026
Team ID	SWTID-2026-4815
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Data Flow Diagram (DFD Level 0 - Simplified):

Agent -> Incident Form -> High Impact Control UI Policy Engine -> Client Script Engine (onChange/onSubmit) -> Incident Table (DB) -> List View -> onCellEdit Validation (State) -> Updated Record

Flow steps:

- Agent opens Incident form (new/existing).
- Agent sets Impact = High -> onChange script fires -> Urgency auto-set to High -> UI Policy makes Assignment group mandatory and Urgency read-only.
- Agent submits -> onSubmit script checks: if Impact = High and Assigned To is empty, block save with error.
- Validated data stored in Incident table.
- Agent/Admin tries to edit State from list view -> onCellEdit script blocks the change with an alert.
- If Impact is changed back to Medium/Low, UI Policy reverses (Urgency editable again, Assigned To no longer mandatory).

User Stories:

User Type	Functional Requirement (Epic)	Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Support Agent	UI Policy - High Impact Control	USN-1	As an agent, I want Assignment group to become mandatory and Urgency read-only automatically when Impact = High	Assignment group is mandatory and Urgency is read-only when condition met	High	Sprint-1
Support Agent	Client Script - onChange	USN-2	As an agent, I want Urgency to auto-set to High when I set Impact to High	Urgency updates instantly on Impact change	High	Sprint-1
Support Agent	Client Script - onSubmit	USN-3	As an agent, I want to be blocked from saving a High Impact incident without Assigned To	Error shown, save blocked when Assigned To blank and Impact = High	High	Sprint-1
Support Agent	Client Script - onCellEdit	USN-4	As an agent, I want to be blocked from changing State directly in the list view	Alert shown, edit rejected when State changed from list	Medium	Sprint-2
Admin	UI Policy Reverse Condition	USN-5	As an admin, I want Urgency and Assigned To	Urgency editable and Assigned To	Medium	Sprint-2

			rules to auto-revert when Impact is not High	not mandatory when Impact != High
